

# NEDSP1061- PCB

## Noise Eliminating PCB module

The **NEDSP1061-PCB** noise eliminating PCB module is an off the shelf DSP noise cancelling solution to clean up noisy voice signals in a variety environments. Its small size and different connection options enable the module to be fitted in a wide range applications. The **NEDSP1061-PCB** eliminates noise and interference while minimising distortion to the audio

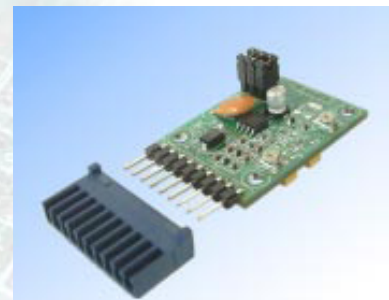

The PCB module can be designed in to new equipment, or retro-fitted into existing equipment.

### Features:

- Fully Adaptive noise cancelling
- Minimum distortion to audio signal
- Noise cancellation 9- 35dB
- Wide audio bandwidth for natural sound
- Input and output sensitivity control
- Input overload indication
- 5 - 15Vdc operation
- Greatly improved signal to noise ratio
- Remote noise cancellation ON/OFF
- Preset or remotely set DSP level
- Mount horizontally or Vertically

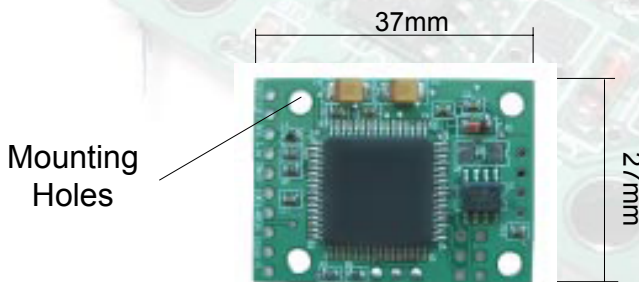

Plug - in Vertical

Horizontal fit - connector

Plug - in Horizontal
